OREGON SCHOOL DISTRICTS

This list gives information for Oregon school districts as they were organized on June 30, 1989. In Part I, districts are arranged alphabetically statewide. In Part II, districts are arranged in numerical order by county.

Letter designations in Part I indicate district organization.

U----- a unified district which operates grades 1 through 12.

Ue---- a unified district which operates only grades 1 through 8. Secondary students attend a high school in another district on a district-paid tuition basis.

E----- an elementary district which operates grades 1 through 8 or 1 through 6.

Some districts have a unified (U or Ue) portion and an elementary portion . Students attend the same elementary school, but may attend different high schools depending upon which part of the district they live in.

UH---- A union high school district which operates grades 9 through 12 for students from component elementary districts.

Some union high school districts operate grades 7 through 12. Component elementary districts thus operate grades 1 through 6. Elementary and union high school districts organized this way are marked with an asterisk.

Elementary district or parts of districts which comprise a union high school district are shown in Part II.

Special designations are:

J----- a joint district with territory in two or more counties. Joint portions are listed in Part II beside joint district listings.

Susp-- a suspended district which does not operate schools, but sends its students to another district's school on a distict-paid tuition basis.

A----- a unified district organized administratively under ORS 330.505 at 330.780.

Average daily membership attending (ADMa) is shown in Part II for each district as of June 30, 1989. ADMa is computed by dividing total days membership by the number of days that schools in the district were in session. ADMa figures beside county names are for students attending ESD-operated programs.

ESTIMATED 1989-90 PER STUDENT CURRENT EXPENDITURES

Source: School District's Form 581-3046 (December 1989)

Columns: (1) Type = District's Organization:

U - A unified district which operates grades 1 through 12.

Ue - A unified district which operates only grades 1 through 8. Secondary students attend a high school in another district on a district-paid tuition basis.

E - An elementary district which operates grades 1 through 8 or 1 through 6.

UH - A union high school district which operates grades 9 through 12 or 7 through 12 for students from component elementary districts.

(2) District Name & UH affiliation = Elementary districts which are components of a UH district are shown with the UH district to which they belong.

(3) Estimated June '90 ADMr = The district's own estimate of its June 30, 1990 annual resident average daily membership.

(4) Current expenditures per ADMr = The district's own estimate of its 1990-90 current expenditures as they will appear in the audit at the close of the school year, divided by column (3). Current expenditures are defined as Net Operating Cost (ORS 327.006(6)) plus Approved Transportation Cost.

(5) Assessed Value per ADMr = Actual Assessed Value from tax rolls for year 1989-90 divided by column (3).

(6) Local Levy, District Rate = The tax rate paid during 1989-90 for the local district school levy.

(7) Local Levy, K-12 rate = The tax rate paid by a taxpayer for the total school program at the local level. For unified districts, this column equals column (6); for elementary districts, this column equals column (6) plus the amount shown in column (6) for its component UH district.

(8) & (9) Total Levy Rates = Same explanations as for (6) and (7) but including rates for the County School Fund and ESD levies.

THE BASIC SCHOOL SUPPORT FUND APPORTIONMENT
For the Fiscal Year Ending June 30, 1990

INTRODUCTION

Oregon's Basic School Support Fund is the product of an initiative petition approved by the voters in November 1946. The first distribution was made in the 1947-48 school year. Legislatures subsequent to that time have made a variety of changes in the way the Fund is appropriated and distributed. The latest change, made by the 1989 Legislature, suspends the pre-existing distribution formula under ORS 327.006 and 327.133 for two years during which each school district will receive an apportionment equal to the one it received the preceding year, updated for inflation and corrected for variations in its student population. For the first year of the biennium (1989-90), the district will receive the greater of the apportionment computed under the old formula (transportation, basic grant, equalization, growth or decline) or with the new formula as expressed above. Furthermore, a global cap has been set because the total appropriation for 1989-90 is lower than the sum of the districts' apportionments as computed resulting in a downward proration for all districts.

The 1989 Legislature appropriated $570.4 million to the Fund for the 1989-90 fiscal year. Of this amount, $4 million was reserved to fund the Early Intervention Program; and $575,000 was set aside to help fund special education hospital and Christie list programs. As required by law, estimates of apportionment were given to each school district by the first Monday in March 1989 in order to assist in the preparation of budgets for the 1989-90 school year.

After the required set-asides, the appropriation for 1989-90 covered approximately 28.7 percent of estimated current expenditures.

Specific information concerning the 1989-90 apportionment follows:

A. Source of Data

Student, financial, and assessed value data used in the computation was for the 1988-89 school year, except that student data used in computing the growth and decline apportionment as well as the adjustment for enrollment change in the new formula were derived from the quarter ending December 31 of the 1989-90 school year. Student membership data was drawn from a variety of state-supplied forms on which information is reported by local districts and ESDs; financial data came from local district audits; assessed value information from the county assessor's tax rolls and various schedules filed by the assessors with the Oregon Department of Revenue.

B. All district apportionments are first computed using the new formula (see Section H) and all results added up at the state level to provide a total amount available to be used in the computation under the pre-existing formula, ORS 327.006 to 327.135.

The pre-existing formula calls for the computed amount available for distribution to be divided into three apportionment accounts: Transportation, Basic Education Program (which includes Basic Grants and Equalization), and Growth and Decline.

1.	Total available for distribution	$561,237,201.24
2.	Less amount set aside for Transportation	44,457,805.00
3.	Available for other apportionment accounts	516,779,396.24
a.	Available for Basic Grants, Growth and Decline (70% of line 3)	361,745,577.37
b.	Available for Equalization (30% of line 3)	155,033,818.87

C. The Transportation Apportionment Under the Pre-Existing Formula

Local school districts providing pupil transportation services in accordance with regulations and standards established by the State Board of

Education were reimbursed a portion of the approvable expenses incurred for home to school transportation of pupils, or for room and board in lieu of transportation. Approvable expenses were determined pursuant to OAR 581-23-040. Sixty percent of the approved cost of pupil transportation, or room and board in lieu of transportation, two years prior to the year of apportionment was set aside in the transportation account. A percentage was computed of the amount available in relation to the total approved cost statewide for pupil transportation in the year prior to the apportionment year. That percentage was then applied to each district's approved transportation cost of the prior year to determine the district's transportation entitlement. The approved cost of transportation in 1987-88 was $74,096,342, of which 60 percent or $44,457,805 was made available for transportation aid in the 1989-90 apportionment. This amount divided by the approved cost of transportation in 1988-89 ($76,348,459) produced a percentage of 58.2301. That percentage, when applied to the approved cost for each district in 1988-89, resulted in a distribution of $44,457,781.

D. The Basic Education Apportionment Under the Pre-Existing Formula

This apportionment consisted of a Basic Grant received by all districts and Equalization apportioned in varying amounts to districts which qualified. Equalization funds were distributed according to the following formula:

Dollar Amount of Approved Program	-	State-Supplied Basic Grant	-	District Receipts from Federal Forest Fees and Common School Fund	-	Dist. Equ. Rate X Dist. Adj. Assessed Value	=	Equalization

The components of the formula interacted to determine how much each district actually received. The six components were:

1. Approved Program
2. Resident Average Daily Membership
3. Basic Grant
4. Nonproperty Tax Receipts
5. Adjusted Assessed Value
6. District Equalization Rate

A brief description of each component follows:

1. Approved Program consisted of approved expenditures as provided under OAR 581-23-041 for the regular school year, grades K-12. Included were expenditures for administration, instruction, health, attendance, operation and maintenance, and fixed charges. Excluded were expenditures for transportation, food service, cocurricular activities, community services, capital outlay, debt service, and expenses for nonresident students.

   For the 1989-90 apportionment, the approved program of most districts was the lesser of the district's audited approved net operating expenditures for 1988-89 or the district's Resident Average Daily Membership multiplied by $2,993.04. If a district was approved for Small School Correction (SSC), the district's approved program was the lesser of the Small School Correction or the district's audited approved net operating expenditures.

2. Resident Average Daily Membership (RADM), the student measure used in apportioning the BSSF, was computed by dividing total days' membership of resident students by the number of days taught. Kindergarten RADM, as computed, was cut in half. The RADM of students participating in part-time programs was computed in different ways, depending upon the nature of the program and the amount of time students participated in the program

3. Basic Grant Each district's basic grant was equal to 26.64504 percent of the district's approved program.

4. Nonproperty Tax Receipts Each district's receipts from Federal Forest Fees and the Common School Fund were components of the equalization formula. These receipts affect directly the amount of equalization money a district receives: for each additional dollar of Federal Forest Fees and Common School Fund, the district will lose one dollar of equalization money; and conversely, any drop in these Nonproperty Tax receipts will translate into an equal gain in the equalization grant.

5. Adjusted Assessed Value (AV) Each district's adjusted Assessed Value was computed as follows:

$$\text{Computed Value of Western Oregon Severance Tax Offset} + \text{District Assessed Value from Assessor's Roll} \times \text{Percentage Reflecting District Type}$$

The computed Assessed Value of the district's Western Oregon Severance Tax Offset was derived through the computation below:

$$\frac{\text{District Severance Tax Offset, 1988-89}}{\text{5 Year Average Local Extended Levy Rate}} = \text{Computed Capitalized Value of WOST}$$

The percentages used to adjust the Assessed Value of districts to reflect "type" of district were as follows:

Type of District	Percentage Used
Unified - Grades K-12	100
Elementary - Grades K-6	50
Elementary - Grades K-8	67
Union High - Grades 7-12	50
Union High - Grades 9-12	33

6. District Equalization Rate For each apportionment, the State Superintendent of Public Instruction must compute the highest uniform millage rate per $100 of approved program expenditures that will distribute the equalization dollars available. For the 1989-90 apportionment, the uniform millage rate was .000336096. Each district's approved program per RADM was divided by 100 and the result multiplied by the uniform rate to compute the district's equalization rate used in the formula. For example:

$$\frac{\text{District Approved Program/RADM}}{100} \times \text{Uniform Rate} = \text{District Equalization Rate}$$

$$\text{District 1} \quad \frac{2{,}993.04}{100} \times .000336096 = .010059487$$

$$\text{District 2} \quad \frac{1{,}907.62}{100} \times .000336096 = .006411434$$

If the approved program per RADM for a district approved for Small School Correction was above the $2,993.04 program limit, the program limit was used in the equalization rate computation.

To illustrate the computation of Basic Grants and Equalization in the 1989-90 Apportionment under the pre-existing formula, four districts are presented below as examples. The figures shown for each are dollar amounts per RADM.

	Approved Program/RADM	less	Basic Grant	less	Fed. For. Fees + Com. Sch. Fund	less	Dist. Eq. Rate x Adjusted AV	=	Equalization
Dist. 1	$2,993.04	-	$797.50	-	$ 40.00	-	.010059487 x 50,000	=	$1,652.57
Dist. 2	$2,993.04	-	$797.50	-	$220.00	-	.010059487 x 200,000	=	no. Equal. ($ 36.36)
Dist. 3	$1,907.62	-	$508.29	-	$ 50.00	-	.006411434 x 60,000	=	$ 964.64
Dist. 4 (SSC)	$3,010.00	-	$802.02	-	$160.00	-	.010059487 x 100,000	=	$1,042.03

E. Growth and Decline Apportionment

1. Apportionment for Growth Growth in RADM was the positive remainder after subtracting the RADM for the year ended June 30, 1989, from the RADM for the quarter ended December 31, 1989. The growth RADM multiplied by the 1989-90 Basic Grant per RADM (for the year ended June 30, 1990) constituted the apportionment for growth. For a district spending at the limit of $2,993.04 per ADM, the Growth allocation for 1989-90 is $797.50 per ADM (2,993.04 x 26.64504 percent).

2. Apportionment for Decline Decline in RADM was 75 percent of the negative remainder after subtracting the RADM for the year ended June 30, 1989, from the RADM for the quarter ended December 31, 1989. The decline RADM multiplied by the 1989-90 Basic Grant per RADM (for the year ended June 30, 1990) constituted the apportionment for decline.

F. Total apportionment was the sum of the apportionments for Transportation, Basic Grant, Equalization, and Growth or Decline.

G. The new formula provides for an allocation equal to the 1988-89 grant (base year) increased by a 5.2 percent inflation adjustment and further corrected by ADM changes between December 31, 1988 and December 31, 1989. The formula can be expressed as thus:

$$\text{1989-90 apportionment} = \text{1988-89 app.} \times 1.052 \times \frac{\text{December 31, 1989 ADM}}{\text{December 31, 1988 ADM}}$$

H. The 1989-90 apportionment for each district is the greater of the results as computed in Sections F and G. Furthermore, because the available appropriation forms a cap at the state level (equal to $565,964,343), the greater amount of F or G is further multiplied by 0.988293 (ratio between amount available, and total amount computed) to determine the actual 1989-90 distribution.

Table 1 provides data by school district regarding the 1989-90 apportionment of the Basic School Support Fund.

Column 1	A local district is shown by district number in the ESD or county in which it is located.
Column 2	The resident ADM of the district for the year ending June 30, 1989.
Column 3	The RADM of the district for the quarter ending December 31, 1988.
Column 4	The RADM of the district for the quarter ending December 31, 1989.
Column 5	The basic apportionment computed via the new formula: $\text{1988-89 BSSF} \times 1.052 \times \frac{\text{December 31, 1989 ADM}}{\text{December 31, 1988 ADM}}$
Column 6	The basic apportionment computed via the pre-existing formula, using a level of available distribution equal to the state total in Column 5.
Column 7	The greater of Column 5 or 6.
Column 8	The actual BSSF apportionment to each district for the 1989-90 school year, after proration (grand total in Column 7 is higher than amount available for distribution).
Column 9	Adjustments from prior years and forfeitures ordered by the Teacher Standards and Practices Commission under the provisions of ORS 342.173.
Column 10	The sum of Columns 8 and 9.
Columns 11, 12, and 13	ORS 327.094 provides that a district may not be paid more in the apportionment year than the estimate given the district for budgetary purposes. If the district is entitled to more than the estimate, the excess is carried over and paid in July in the following fiscal year, 1990-91 (Column 13). The amount paid the district from the 1988-89 carryover is represented by Column 11. (Column 12 represents the amount actually received by the district in 1989-90, i.e., Column 10 plus Column 12 minus Column 13 (overpayments are excluded).
